CALIFORNIA TAKES

WALKER'S POSITION

H. D. Summils, a tariff expert of the California public service and railroad commission, was named secretary of the Nevada public service and railroad commission to succeed E. H. Walker, who resigned a month ago.

What Does Electric Service

Mean to You?

To us it means power houses with their equipment costing millions of dollars, always at your command at the turning of a switch. It means miles of transmission lines costing additional millions.

It means competent men must keep a constant watch day and night over the machinery which is turning mountain streams into electricity, and constant patrolling over all these lines throughout the year, during the killing cold of winter in the High Sierras, and the terrific heat of the desert in the summer time.

It means the maintenance of a large force to watch every item of the company's business so that the public may be served with the least possible inconvenience to it. It means all this at a rate as low as is compatible with sound business principles.
